PRESS RELEASE

Lower Price for Natural Gas Starting in November

In concern for all its customers, both household and business, following the initial reduction in natural gas prices, which will apply from the beginning of 2024, GEN-I is now further reducing the price of natural gas starting in November. The price of natural gas as from 1 November 2023 is €0.05840/kWh (excluding VAT) or €0.07125/kWh (including VAT) for household customers as well as €0.05940/kWh (excluding VAT) or €0.07247/kWh (including VAT) for small business customers.

Ljubljana, 10 November 2023 – After a significant increase in the natural gas prices on the international markets last winter, the situation in the natural gas market has stabilised, thereby allowing for more favourable purchases of energy for end consumers.

Thus, due to the successful management of its international purchasing portfolio and currently favourable conditions in the natural gas markets, GEN-I has managed to provide its existing and new customers with a natural gas price which is lower than the regulated price.

The new price of natural gas for household customers is €0.05840/kWh (excluding VAT) or €0.07125/kWh (including VAT) as well as €0.05940/kWh (excluding VAT) or €0.07247/kWh (including VAT) for small business customers. The new natural gas prices for both household and business customers are now valid as from 1 November 2023.
